Professional Summary

I am currently pursuing a Master's in Computer Science (Big Data & Artificial Intelligence) at SRH University, Leipzig, with a Bachelor's in Computer Science Engineering. Through internships and academic projects, I have gained hands-on experience in React.js, .NET, SQL, and cloud technologies. I am passionate about software engineering and modern web applications, and am actively looking for internship opportunities in software development and IT.

Work Experience

DevOps Intern | Moka Software Private Limited

Nov 2025 – Feb 2026

- Worked on CI/CD workflows, deployment support, and environment configuration for software operations
- Supported API integration, debugging, and production monitoring activities
- Collaborated on deployment workflows and software operations within agile environments
- Gained practical exposure to cloud technologies and software delivery practices

Engineering Intern | Biosoft Health Tech Private Limited

Oct 2024 – Dec 2024

- Supported development of web applications using React.js, .NET Core, and SQL Server
 - Developed and tested REST APIs using .NET Core and SQL Server
 - Supported frontend-backend integration using React.js and authentication APIs
 - Worked on debugging, testing, and application enhancement activities
-

Education

M.Sc. Computer Science - Big Data & Artificial Intelligence

Apr 2026 – Present

- Developing knowledge in Big Data, Machine Learning, Cloud Computing, and AI-driven technologies through coursework and project-based learning
- Building practical skills in data analysis, scalable software systems, and advanced programming concepts for real-world applications

B.Sc. Computer Science

Dec 2021 – Jun 2025

- Developed foundational knowledge in software engineering, databases, data structures, algorithms, and web technologies
 - Applied academic concepts through hands-on projects focused on software development and problem-solving application
-

Projects

Data Analysis Toolkit

Jun 2025 – Present

- Developed a Python-based Data Analysis Toolkit to automate repetitive data analysis tasks, reducing manual effort involved in cleaning, preprocessing, visualization, and model preparation for structured datasets.

- Implemented modules for data cleaning, missing value treatment, outlier detection, feature engineering, statistical analysis, and automated visualization, enabling users to perform end-to-end exploratory data analysis with minimal code.
- Integrated machine learning workflows including data preprocessing, model training, evaluation, and performance reporting, providing a reusable solution for data science projects, research, and business analytics applications.

Vital Guard IoT-Based Safety System for Seniors and Disabled

Dec 2024 – May 2025

- Developed an IoT-based wearable fall detection system using ESP8266, MPU6050, GPS, and Blynk to monitor movement patterns and detect emergency situations
- Integrated real-time GPS tracking and automated alert workflows to send emergency notifications and location details to caregivers
- Conducted system integration, testing, and debugging to improve detection accuracy and reduce false alarms across different movement scenarios
- Collaborated within a team environment during development and implementation of a healthcare solution for elderly and assisted-care applications

Video Anomaly Detection System

Oct 2024 – Mar 2025

- Developed a Video Anomaly Detection System using Transfer Learning and Fine-Tuning on pre-trained CNN models to identify unusual activities from surveillance video streams
- Implemented a workflow including frame extraction, preprocessing, feature learning, and model training using Python, TensorFlow and OpenCV
- Performed testing, debugging, and performance evaluation using UCSD Ped1, UCSD Ped2, and CUHK Avenue datasets to improve detection accuracy and model efficiency
- Collaborated within a team environment during implementation and validation while contributing to applications in smart surveillance, public safety, and real-time security systems

Certifications

- AWS Cloud Practitioner (CLF-C02) Training
- Data Analytics Internship Certification
- AI Tools Workshop Certification

Technical Skills

- **Programming:** Python, Java, C#, JavaScript
- **Web & Development:** React.js, .NET Core Web API, HTML, CSS, REST APIs
- **Databases:** MySQL, SQL Server
- **Cloud & Tools:** AWS Cloud, Git, GitHub, Postman, Swagger, Visual Studio Code
- **Data & Analytics:** Pandas, NumPy, Machine Learning, Natural Language Processing (NLP)
- **Development Practices:** Full-Stack Development, CI/CD Basics, Agile Methodologies
- **MS Office:** Microsoft Excel, PowerPoint, Word, Outlook

Languages

- Kannada – Native
- English – Professional Working Proficiency (C1)
- German – B1 (Currently Pursuing)

I hereby confirm that the information provided above is accurate and reflects my qualifications, experience, and achievements to the best of my knowledge.

Place: Leipzig, Germany, 25.06.2026
